TECHNICAL DATA SHEET

SINGLE GRIP HARVESTER OIL

PRODUCT DESCRIPTION

Premium mineral oil designed to lubricate the chains and sprockets on single grip harvester machines found in the forestry industry.

Minimum wear due to antiwear and extreme pressure additives thus ensuring maximum life of chains and sprockets. Has a high level of tackiness additive ensuring maximum cling and reduction in consumption and anti fling from fast moving chains and sprockets significantly reducing blade wear and chain stretching in saws operating at top output.

SINGLE GRIP HARVESTER OIL will lower maintenance and servicing costs when compared to using non specific oils due to lower quality products without a balanced package of specialist additives.

TYPICAL INSPECTIONS

Viscosity Grade @ 40°C	220
Density @ 15°C	0.895
Viscosity Index	98
Flash Point °C (COC)	230
Pour Point °C	-10
ASTM D665 Rust Test	Pass
